THROUGH YEARS OF EXPERTISE, WE PROUDLY PRESENT YOU THE FUTURE OF OUTDOOR LIVING WITH OUR COMPLETE OUTDOOR KITCHENS

All over Europe, we are living more outdoors these days. Spending as much time as we can outside gives us a better health and we feel more happier.

To even further extend te possibilities we want to bring our inside living outside. To achieve that, you will need a complete outdoor kitchen in your outdoor living space to make it possible to prepare all your meals outside while socialising with your family and friends.

With the Outdoor Kitchens from Grandpro you can achive just that! We have complete kitchens available for you in all sizes, prices and possibilities.

On our kitchens you can prepare your food on the big working space, wash your vegetables before cooking, you can keep your drinks cool and your food fresh in our fridge and prepare all the meals in one of our Barbecues. And during that, you can stay outside with your family and friends to enjoy the days outside even better.

**Quality is key
with a focus on
outdoor living**
